1-2-star (Fail)

Absolute nightmare 🚩🚩🚩 I literally begged the mechanic for a lightweight bike because I carry it up 4 flights of stairs. What did I get? Another 20kg steel monster with useless suspension that eats all my pedaling energy! My knees hurt worse than before. Wasted my last savings on this. Ladies, avoid this place at all costs!!! 😭

3-4-star (Mid Match)

Cute shop (the dog behind the counter is adorable 🐶), but the bike build was... questionable. I mean, the frame size is finally right (no more toe overlap, yay!), but it's still pretty heavy and shifting gears is a mess. It's okay, but I expected more for my budget. 🙄

5-star (Perfect Match)

I AM OBSESSED!!! 😍 These guys actually know what they're doing! They built me a super lightweight aluminum bike with a 1x drivetrain — no more dropped chains, and I literally fly up the hills now. My morning commute went from absolute torture to the best part of my day! Thank you Ash, you saved my knees and my sanity! 10/10 highly recommend! ✨🚴
